# About FlowX Protocol

2026

Web3/  
Tech

FlowX is a next-generation decentralized liquidity protocol designed to optimize cross-chain value movement.

It integrates token minting, reward distribution, deflationary burns, and liquidity strengthening into a unified ecosystem.

Built on transparent and immutable smart contracts, FlowX ensures scalability, sustainability, and long-term utility.

» Multi-Chain Compatible    » Deflationary Token Model

# Centralized Web

2026

Web3/  
Tech

# v/s Web3

Centralized systems are governed by a single authority, whereas Web3 operates on decentralization, transparency, and user ownership principles.

## Centralized Web

- Controlled by a Single Authority
- Private Data Storage
- Platform Ownership
- Limited Transparency

VS

## Web3 Ecosystem

- Decentralized Governance
- Blockchain Transparency
- User Asset Ownership
- Trustless System

## Key Advantages

- » Decentralized Control
- » Smart Contract Automation
- » Ownership Renounced
- » Tokenized Economy

# FlowX Ecosystem Components

# How The Contract Works

2027

Web3/  
Tech

## 01

### Minting Event

- » 80% of the transaction value is minted into FlowX tokens and generated instantly through the smart contract.

## 02

### Price Impact (Liquidity Pool)

- » 20% of tokens are automatically allocated to the Liquidity Pool, strengthening market depth and creating positive price impact on every transaction.

## 03

### Sell Burning Event

- » 15% of tokens are burned on every sell transaction, reducing circulating supply and supporting long-term price stability.

## 04

### P2P Sell Burning Event

- » 10% of tokens are burned on every peer-to-peer sell transaction, ensuring supply control and maintaining ecosystem value.

# FlowX Tokenomics

## Core Security

1

- Zero Supply Token
- Ownership Transferred to Null Address
- 100% Smart Contract Renounced (Immutable)

## Anti-Whale Protection

2

- Max Tx Limit (per transaction)
- Max Wallet Holding Limit
- Cooldown / Time-gap (optional)
- High-volume sell protection (optional)

## Transaction-Based Mechanism

3

### ✔ Buy Transaction (Mint Logic)

- Token Minting is triggered on every buy transaction.
- Goal:
- Maintain liquidity, improve distribution, and create positive price impact.

### ✔ Sell Transaction (Burn Logic)

- Token Burning is triggered on every sell transaction.
- Goal:
- Reduce supply, support value, and stabilize price impact.

## Burn-Driven Value Creation

4

- Mint on Buy → Ecosystem growth support
- Burn on Sell → Supply reduction support
- Result: Continuous value creation via activity

2026

Web3/  
Tech

## Fully Decentralised

- » Ownership transferred to null address
- » 100% smart contract renounced

## Supply-Control Framework

- » Mint & burn supply balancing
- » Deflationary value structure

## Anti-Whale Protection

- » Transaction & wallet limits
- » Market stability safeguards

## Sustainable Token Economy

- » Activity-driven value creation
- » Long-term ecosystem growth

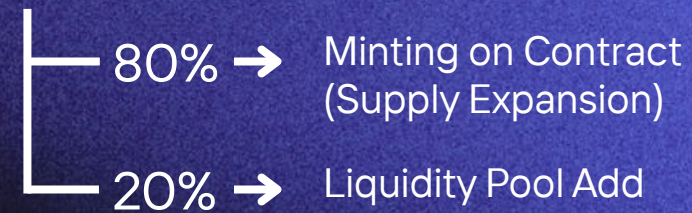

# FlowX Unique Mechanism

## Minting + Burning Protocol with Liquidity Price Boost

### ● Buy Mechanism Flow

#### BUY TRANSACTION

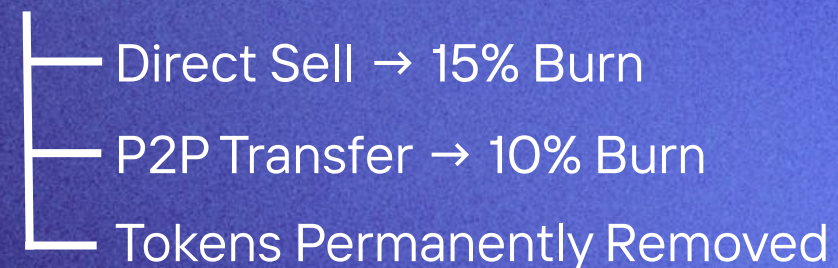

↓  
**LP Price Boost**

#### Impact

- Circulating supply decreases
- Deflationary pressure created
- Sell pressure reduced

### ● Sell Mechanism Flow

#### SELL TRANSACTION

↓  
Supply Reduction

↓  
**LP Price Boost**

#### Smart Contract Automation

- » Buy & sell logic executed automatically
- » No manual intervention

#### Liquidity Integration

- » LP allocation on buy activity
- » Depth & stability enhancement

#### Deflationary Burn Engine

- » Supply reduction on sell
- » Permanent token removal

#### Price Support Mechanism

- » Liquidity strengthening model
- » Market pressure balancing

# FlowX token price will never go down

### Rank qualification criteria

- Minimum 2 Legs Required.
- The highest business leg will be treated as the **Stronger Leg**.
- For each rank, the required business target must be achieved from the weaker legs.
- Excess Business in the stronger leg will be carried forward as **Stronger Leg Business**.
- Rewards Accumulated system.
- Business Allowances from Leader to Ambassador Ranks.
- There is no time limit for rank qualification.

# About SocialBuddy AI & Why It's Important

2026

End-to-End Blockchain  
& Web3 Solutions

Your AI Marketing Employee — Working 24x7.

## What is SocialBuddy AI?

SocialBuddy AI is an AI-powered marketing automation platform designed to help businesses, self-employed professionals, and field workers automate their digital promotion without hiring agencies.

It creates, schedules, and publishes posts automatically — saving time, cost, and effort.

## Why It's Important

- Small Businesses: Auto product & offer promotion
- Self-Employed: Personal branding & awareness
- Network Marketers: Plan & referral promotion
- Field Workers: Promotion runs in background

## One-Step Setup — Fully Automated

- Just upload your presentation / business profile,
- provide your social media account details,
- and set your daily posting time.

After that, SocialBuddy AI automatically manages everything for you.

# Market vs SocialBuddy AI

2026

End-to-End Blockchain  
& Web3 Solutions

## Traditional Market Cost

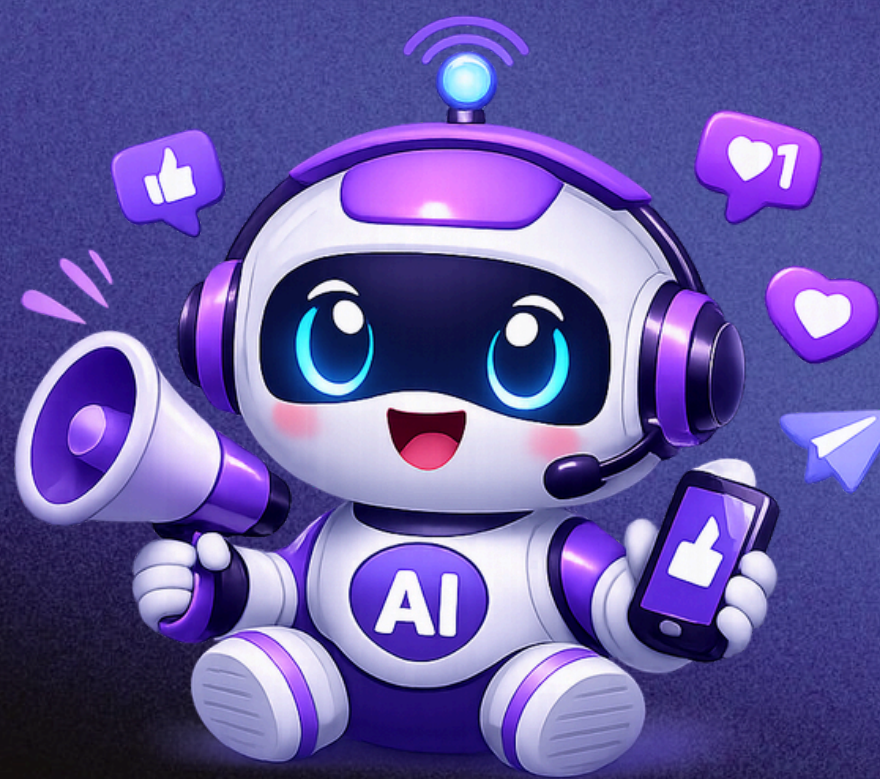

Hiring a social media agency costs:

**\$700 – \$2000 / Month**

(Including software tools)

## Market Challenges

- Need to brief before every post
- Content approvals required
- Follow-ups & revisions
- Time investment
- Limited tracking transparency

**SocialBuddy AI**

## SocialBuddy AI

One-Click AI Automation Model

**Cost: \$50 – \$200 / Month**

## What It Does:

- Auto post creation
- AI reels & videos
- Caption & creatives
- Scheduled publishing
- Referral promotion
- Lead tracking & analytics

**Works like your AI employee**  
— 24x7 automation

# Ecosystem Roadmap

2026

Web3/  
Tech

## Building a Complete Web3 Utility & Earning Infrastructure

### Phase 2 — Product Launch (6 – 12 Months)

- SocialBuddy AI launch
- Marketing automation rollout
- Subscription activation
- Business onboarding

👉 Goal: Utility + revenue start.

### Phase 1 — Community Build (0 – 6 Months)

- Global community expansion
- Leader & partner onboarding
- Social media growth
- Referral & awareness campaigns

👉 Goal: Strong user base foundation.

### Phase 3 — Crypto Card (12 – 18 Months)

- FlowX Crypto Card launch
- Crypto → Fiat conversion
- ATM & payment support

👉 Goal: Real-world spending utility.

### Phase 4 — FlowDex Launch (18 – 24 Months)

- Spot & perpetual trading
- Liquidity pools
- Vault trading

👉 Goal: Strong user base foundation.

### Phase 5 — Global Expansion (24 – 36 Months)

- Multi-chain integration
- AI trading tools
- Web3 payment gateway

👉 Goal: Full Web3 ecosystem scale.

# FlowX Staking – Terms and Conditions

2026

Web3/  
Tech

## 1 – Platform & Withdrawal

- Minimum Staking: \$10
- Instant Withdrawals: 24/7
- Minimum Withdrawal: \$10
- Withdrawal Fee: 5%
- Staking through USDT (BEP20)
- Fee Allocation: 10%
  - 6% – Ecosystem Development
  - 2% – Community Building
  - 2% – Contract Maintenance
- Passive Income: Up to 2X
- Active Income: Up to 3X

## 2 – FlowX Staking Stream

- Weekly Staking from: \$10
- Duration: 25 Weeks
- ROI Impact Has the Potential to Multiply Through Weekly Participation
- Rewards distributed via Smart Contract
- Weekly staking increase rewards
- Missed Week → Rewards Pause
- Re-stake → Rewards Resume
